

## Structure of the Journal of Business Cycles

### 1. The Journal

#### 1.1. About

Revista del Ciclo Económico © (RCE) is a general interest academic Journal, founded in 2014 and edited twice a year for economists from three Private Advisory Firms: Value Fronteira Ltd. (Lagos, Nigeria), MaxMin International Systems (Port Louis, Mauritius), and CICLO ECONOMICO™ (Buenos Aires, Argentina) whose previously work together creating the *Economist of the World Review* (EOW), an on line based publication born in the same group at Linked In.

Following a double-blind evaluation process with external referees, RCE publishes articles of academic excellence in the business cycles field from emerging economies and acting as reviewer of working papers published anywhere.

RCE is establishing a bridge between emerging economies, traditionally called *under development* or *peripherals*, researching about they history of economic thought, theory and empirical evidence. The network gave us the chance to work under a multiculturalism team. RCE© count with three bodies to run on its management: the Editorial Board, the Academic Board, and the Advisory Board. The first is the Executive Body, the second drive the editorial policy proponed by the first, and the third is the International Body composed by academics and professional around the world those who are consulted periodically.

Edited in Port Louis (Mauritius) and distributed electronically from Buenos Aires (Argentina), it's audited and supervised in Lagos (Nigeria), hoping that at the end of 2015, we can distribute it electronically under a multiculturalism framework in Johannesburg (South Africa) to Africa, in Quito (Ecuador) to Latin America, in Ottawa (Canada) to North America, in Edinburgh (Grande Bretagne) to Europe and in Kuala Lumpur (Malaysia) to Southeast & Asia pacific, in New Delhi (India) to Central Asia, and from Tel Aviv to Middle East.

Network expected to be connected by *Revista del Ciclo Económico* at the end of 2015: Asunción – Aracajú – Beijing – Brasilia – Buenos Aires – Cali – Campinas – Edinburgh – Guayaquil – Glasgow – Kuala Lumpur – Lagos – La Habana – London – Luján - Medellín – New York – Ottawa – Panamá – Port Louis – Quito – Rio de Janeiro – Salta – San José – Santiago – Saõ Paulo – Tandil – Valparaíso – Viña del Mar – Washington DC – Zürich.

## **1.2. Design**

### **1.2.1. Cover**

We will design our Journal (RCE), following the Journal of Economics Literature. For more details, go to [www.aeaweb.org/jel](http://www.aeaweb.org/jel)

Edited by MaxMin International System <sup>TM</sup>; Published by Ciclo Económico <sup>TM</sup>, and; Distributed by ValueFronteira Ltd.

### **1.2.2. Foreword**

No longer than 2 pages. An academic will be invited to write about the theory, economic thought, history, empirical evidence, and computational & mathematical methods in this first quarter (of 21<sup>st</sup>) century applied in the field covered by the Journal of Business Cycles. First issue: Martin Oluba.

### **1.2.3. This (first) issue**

No longer than 2 pages. After the papers has been selected to publish, and in the same sense of the foreword, an academic will be invited to write comments about specifically of the issue. First issue: to be designed...

### **1.2.4. Art of Economists**

Places over the time (AoE), one picture is selected from those have been received around the world. These pictures are contributions from the authors and they have the rights over them that will be transfer us exclusively to distribute inside the Journal of Business Cycles. We don't use the pictures received for any other uses.

### **1.2.5. Index**

### **1.2.6. Papers and articles**

7 (max). At the beginning of each paper will start with a picture (like 1.2.4), preferred from emerging places around the world.

### **1.2.7. Working paper review**

5 (max). Working papers reviewed from any economist from any place (BSc. or upper degree), the only restriction is that it central core will be the economic fluctuations. For more details about the style, extensions and requirements, please, see the paper nº 1: *Instructions for authors and wp reviewers: styles and submissions guide*.

### **1.2.8. Emerging firms & Research Departments**

In this section we promote those firms who work analyzing the business cycles and Research Departments, principally, but not exclusively, from Universities and Government Agencies. Respect the Emerging Firms, we will give priority to those from emerging markets. We expect to promote 2 Firms & 2 Research Departments by issue.

### **1.2.9. Research products offer**

Throughout our studies, we have familiar with programs such as Tsp, Stats, Matlab, Octave, and others. Since technological change accelerated at the beginning of the 21<sup>st</sup> century, many of the classic programs have been in disuse, being replaced by others more complex. At the same time, it is common to economists to programming in VBA for Excel. In this section (of random publication), introduce innovations in the field of Computational Economics programs, and always with a preference by the stroke of the time series.

*Taking advantages of a global disequilibrium era, we add two sections promoting the research around the world under a multiculturalist framework: Working together and seeker proposal.*

### **1.2.10. Working together**

Here, those economists who want to work with others in different places, have the opportunity to post their lines of research and the requirements to be part of the wp.

We only act promoting the work in the field of economic cycles among economists around the world. We do not accept any payment or assume responsibility for the results or decisions of those who, through *RCE* ©, develop the proposed lines of research. Our only requirement: *priority*, that is, when the working paper has been completed, the authors submit for it evaluation by our Editorial Board.

### **1.2.11. Seeker proposal**

Inverting the sense, those economist who want to work with others, but they haven't any proposal for the moment, they can request to be considered for research in the field of economic cycles. The same responsibilities and requirements of the previous point apply in this case.

### **1.2.12. Call for papers**

Usually, we receive some *cfp* from events, congress, and workshops around the world. In the case that the business cycles will be included like theme, session, and a special conference, we add into the Journal.
