The world as we know it needs a new economics. Climate change, financial crisis and out-of-control globalization – all the major problems facing the world – have their root in the dominant economic system.

The globalised marketplace is the prevailing force in our lives, undermining the real importance of our human communities and our planet. **Green Economics** argues that society should be embedded within the ecosystem, and that markets and economies are social structures that should respond to social and environmental priorities.

**Molly Scott Cato** is a Reader in Green Economics at Cardiff School of Management and Economics Speaker for the Green Party. She is also a member of the core group of Transition Stroud and regularly addresses other Transition Towns on economics themes.

The Step-by-Step Guide to Sustainability Planning: How to Create and Implement Sustainability Plans in Any Business or Organization – Darcy Hitchcock and Marsha Willard with foreword by Alan Atkisson

‘If you do not already know how to create and manage a sustainability programme for your company, institution or organization, you soon will. And if you already work with such a programme, these authors have done you the inestimable service of assembling, between two covers, a vast storehouse of how to, when to and where to go for more.’ Alan Atkisson

From the authors of the award-winning handbook The Business Guide to Sustainability comes this highly practical guide to designing and implementing a customized sustainability plan in any business, organization or government department of any type and scale.

The ISIS Agreement: How Sustainability Can Improve Organizational Performance and Transform the World

Alan AtKisson

‘AtKisson’s Accelerator tools and ISIS Method are powerful ... This book is the essential guide.’
Hunter Lovins, President and founder of the Natural Capitalism Solutions

This book presents AtKisson’s potent Accelerator, adopted for use in dozens of countries by business, governments, and organizations such as UNEP. The potent ISIS (Indicators, Systems, Innovation, Strategy) method teaches leaders how to create a whole-systems view of their organization, to leverage the potential for innovative change that adds value and accelerates progress towards sustainability.
