Book Reviews

**INTERVENTION. European Journal of Economics and Economic Policies** is a peer-reviewed journal which serves as a forum for studies in macroeconomic theory, economic institutions and economic policies. *INTERVENTION* invites contributions acknowledging the pluralism of research approaches in economics. It aims at a productive debate and reciprocal interventions among such approaches. In particular, the editors hold that a wide variety of institutional and social factors shape economic life and economic processes. Only a careful study and integration of such factors into economics will lead to theoretical progress and to adequate economic policy recommendations. Therefore, the submission of theoretical and empirical work in these fields is encouraged.
